

**\*Please contact Diane Hubert <dhubert@chartermi.net> for more information\***

Rio Grande still sells this model for \$1095. (See below)

[http://www.riogrande.com/MemberArea/ProductPage.aspx?assetname=705107&page=GRID&ree\\_text=VIC+9](http://www.riogrande.com/MemberArea/ProductPage.aspx?assetname=705107&page=GRID&ree_text=VIC+9)

I'd like \$600 for mine and I will include 20+ flasks, casting dish (in photo), about 30+ lbs of investment (box below casting machine)

I will include whatever I have that is auxiliary to casting. (tongs, gloves, whatever I have)

This kiln is approx 8"Wx6"Dx10"H. It works well but does not have a programmable timer I'd like \$125 for mine.

The cheapest kiln at Rio is \$595 (see below)

[http://www.riogrande.com/MemberArea/SearchPage.aspx?page=GRID&free\\_text=kilns](http://www.riogrande.com/MemberArea/SearchPage.aspx?page=GRID&free_text=kilns)

The vulcanizer is old but work perfectly well. It goes to temperature and holds.

I would like \$125 for mine. I will include aluminum frames and whatever mold rubber I have left.

New ones from Rio are \$895 (see below) but they have more advanced controls.
